PROFILE

Computer Engineering student and full-stack developer who builds responsive, user-focused web applications across the frontend and backend. Comfortable with JavaScript, C#, Node.js and SQL, and with turning ideas into working products with clean, maintainable code. Currently expanding into PHP frameworks.

EDUCATION

Olabisi Onabanjo University Expected graduation: early 2028

Computer Engineering (currently 400 Level)

EXPERIENCE

Web Developer Intern — RMSys Solutions Jul 2026 – Oct 2026

- Built responsive web pages and user interfaces using HTML, CSS and JavaScript.
- Contributed to web development tasks across the frontend and backend as part of a three-month internship.

TECHNICAL SKILLS

Languages: HTML, CSS, JavaScript, C#, SQL

Frameworks & Backend: React, Node.js, Express.js, REST APIs

Data & Tools: Excel, Power BI, Git & GitHub

Currently Learning: Laravel, CodeIgniter

PROJECTS

Expenses Tracker JavaScript, HTML, CSS, SVG charts — Live demo

- Built a personal finance dashboard to add, edit and delete expenses and track weekly and monthly spending against a set limit.
- Implemented a category pie chart, a yearly overview chart, filtering by period and category, and CSV export; data persists in the browser.

Slot Machine JavaScript, Node.js, HTML, CSS — Play live

- Developed a slot machine game, first as a Node.js command-line app and then as a responsive web game.
- Implemented weighted symbols, multi-line betting, balance tracking and per-line payout logic with input validation.

Stay Timeless Responsive web design

- Designed and built the front end of a luxury fashion e-commerce site covering product browsing, product detail, cart and checkout pages.

Homyz Responsive web design

- Built a real estate web app with property search, featured listings and detailed property pages in a clean, mobile-friendly layout.

TastyBite Responsive web design

- Created a food delivery website for browsing menus and placing orders, with smooth navigation across desktop and mobile.
